October 2022

## NOF EXHIBITS AT MEDICA 2022, Düsseldorf, Germany (November 14 - 17)

NOF CORPORATION will exhibit NOF's additives for diagnostics at MEDICA 2022 held at Düsseldorf, Germany.

Please come and see us in order to get new information for BIOLIPIDURE® series, LIPIDURE®-GD series and EVERBRITE® series at **Hall 1 / D35**.

### 1. BIOLIPIDURE® series

Our product, BIOLIPIDURE® series (MPC※ polymer), has the following features as diagnostic reagents for various kinds of immunoassay such as lateral flow tests, latex agglutination, ELISA and chemiluminescence immunoassay.

- Enhancement of sensitivity and accuracy
- Suppression of non-specific adsorption
- Stabilization of antibodies and enzymes
- NO lot-to-lot variations and NO biohazardous risk

※MPC : 2-methacryloyloxyethylphosphorylcholine

BIOLIPIDURE® has been used for SARS-CoV-2 antigen and antibody rapid tests. The data supporting the enhancement of sensitivity by using BIOLIPIDURE® will be introduced at our **Hall 1 / D35**.

### 2. LIPIDURE®-GD series, new additives for PCR **[NEW]**

- For higher sensitivity
- For better detection
- For higher stability of the master mix

### 3. EVERBRITE® series, Activated PEGs for diagnostics **[NEW]**

- Suppression of non-specific adsorption on magnetic beads and microplates by using mono-functional linear PEGs

- Stabilization of enzymes by using mono-functional linear PEGs
- Linker for immobilized antibody, enzyme-labeled antibody and antigen by using hetero-type activated PEGs
- Accumulation of secondary antibodies by using multi-arm PEGs

If you are interested in our technologies/products, please visit our **Hall 1 / D35** during the conference or contact our regional office below.
