Start of business from raw material fish oil to oil and fat processing

Dynamite

Margarine / Shortening

Bread

Candles

Diversification of oils and fats business

Equipment (gun ammunition)

Electric detonators

explosives Rockets

Synthetic detergent / Neutral detergent for kitchens

The World Created through NOF's Technology

When NOF began operations in 1937 as an oleochemical manufacturer, we offered only a limited range of products. Later, in response to changes in industrial structures and global needs, we expanded our operations into the area of petrochemicals from the 1970s. Furthermore, by pursuing the functions of the materials that NOF possesses, we have developed a wide range of customer segments, including biocompatible materials and DDS. As a result, NOF materials are used in a wide variety of products that you see in your daily life, from daily necessities such as food, pharmaceuticals, and cosmetics to industrial products such as automobiles, home appliances, construction products, and electricity-related products.
