

Promote occupational safety and health

The NOF Group works to promote occupational safety and health by sharing activity targets as activities related to “occupational safety” among RC activities classified into “five components of safety,” and is developing Group-wide activities, including those of affiliated companies at each works, based on the RC management system.

Occupational Safety and Health Policy

With the aim of eliminating occupational accidents, the NOF Group has clearly expressed its determination to make its workplaces secure and safe for all workers involved in Group activities, including outside contractors, and to realize this ideal, set forth its Occupational Safety and Health Policy in April 2006. Under this policy, each of our works,

plants, and Group companies are engaged in initiatives including the establishment of an occupational health and safety management system.

Occupational safety activities (RC activities)

The status of occupational safety activities at NOF’s works, plants, and Group companies is confirmed through regular RC audits. Along with audits, we are working to revitalize RC activities throughout the Group, with members of labor unions and Group companies also participating in RC audits as auditors. The results are reported to the RC Committee, as well as being shared with labor unions to develop joint labor–management activities.

Moreover, recognizing the importance of safety education, the NOF Group strives to further enhance its occupational safety and health management system and reinforce its safety activities, including promoting safety education, in an effort to ensure the safety and health of its employees.

Occupational Safety and Health Policy

Basic philosophy

We, as a group of chemical companies, shall endeavor to secure the safety and health of our employees and local communities in the belief that “no business can be viable without safety.” All the officers and employees shall be committed to the buildup of “workplaces where we can work safely and securely” in close teamwork consistent with Responsible Care activities, and positively promote activities for occupational safety and health.

Fundamental principles

- (1) We shall organize an appropriate self-management system regarding occupational safety and health, and continue necessary management and improvement.
- (2) Our target shall be the eradication of labor accidents by improving the working environment, making the equipment intrinsically safe, and carrying out risk-reducing activities in anticipation of future changes in the working environment.
- (3) We shall faithfully observe relevant laws and regulations and our own rules and standards.
- (4) We shall endeavor for the creation of a pleasant working environment and support efforts for keeping and promoting health.
- (5) We shall make the Occupational Safety and Health Policy thoroughly known to all the employees, and review it every year or as necessary.

The principles will be made widely available to the general public.

(Amended April 2015)
