GRI 304-1,2,3,4

Biodiversity conservation activities visualized with a map

In addition to “forest planting” through creation of green areas alongside roads as well as thinning and pruning company-owned forests, we are implementing plans that contribute to biodiversity at our sites across Japan through protection activities mainly for endangered species, extermination of invasive non-native plants, and donation activities.

Clicking on an initiative written in green will take you to the page with details.

Company-wide

Going paperless

Company-wide

Recycling of plastic waste

Oita

Modal shifting

Amagasaki

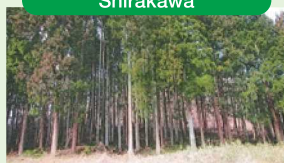

Introduction of alternative methods to animal testing in the evaluation of cosmetics materials (animal welfare)

Participation in “Amagasaki Forest Central Green Space Forest Planting” volunteer activities

Shirakawa

Forest maintenance (Nippon Koki Co., Ltd.)

Kawagoe

Solar panels (NIGK Corporation)

Aichi

Taketoyo community tree planting festival (seedling purchase and sponsorship)

Weeding of the Designated Invasive Alien Species “lanceleaf tickseed”

Bibai

Protection of Japanese swamp lantern clusters (Nippon Koki Co., Ltd.)

Head Office

Donations aimed at protecting the global environment (WWF, Green Fund, Keidanren Nature Conservation Fund, etc.)

Use of FSC-certified paper

Green procurement

RSPO membership, participation in the Japan Business and Biodiversity Partnership, endorsement of the Keidanren Initiative for Biodiversity Conservation, participation in JaSPON

Kawasaki

Purchase of electricity certified to come from non-fossil fuel sources

Food waste reduction (functional foods)

Modal shifting, joint deliveries

Participation in the Kawasaki City Green Office Promotion Council
Creation of rooftop greenery, green walls, and greenery on our grounds

Participation in the Forest Restoration Partner System (NOF METAL COATINGS ASIA PACIFIC CO., LTD.)
