Passing on skills and techniques

Response to climate change (reduction of greenhouse gas emissions)

Industrial waste management and reduction (zero emissions)

Reduction of emissions into atmosphere of PRTR Act-controlled substances

Stable operation of environment-related facilities

Responses to natural disasters

Implementation of assessments at the time of new construction or changes

Ensuring compliance with chemical substance control laws and regulations

Elimination of unsafe behavior and unsafe conditions

Plant safety

Environmental safety

Product safety

Promotion of safe distribution

Elimination of traffic accidents

Zero accidents with equipment damage

Zero emissions of environmentally hazardous substances

Zero inappropriate incidents

Labor safety

Transportation safety

Zero accidents with lost workdays

Zero accidents that adversely affect distribution
