JUL 2015

NOF EXHIBITS AT 2015 AACC, ATLANTA, GA (JULY 28 – 30)

NOF CORPORATION will exhibit at this year's AACC: AACC Annual Meeting & Clinical Lab Expo held at Georgia World Congress Center from JULY 28 to 30 (Booth #4257).

<Additives for Diagnostics>

Our product, Biolipidure[®] series (MPC polymer) have following features as diagnostic reagent.

- Enhancement of sensitivity and accuracy
- Suppression of non-specific adsorption
- Stabilization of antibody and enzymes
- NO lot-to-lot variations and NO biohazardous risk

Also, we are pleased to introduce our new product (low molecular weight), Lipidure[®]-SF series as diagnostic reagent which can be useful for blocking and stabilizing. Lipidure[®]-SF series are expected to have more useful blocking effect (less masking effect) for antibody-conjugated microparticle like latex and magnetic beads than high molecular weight polymer in some cases.

<Any other examples of application using our products in medical area>

- Coating for medical device such as catheter, artificial heart or joint
- Contact lens and lens care solutions
- Eye drop with high hydration
- Solubilizer for hydrophobic drugs

If you have any interests for these products, please stop by our booth#4257 at AACC or contact to our regional office as follows.
