NOF to Showcase its Products for IVD at ADLM 2025

Tokyo, Japan – July 2, 2025 – NOF CORPORATION is excited to announce its participation in the upcoming ADLM 2025 Clinical Lab Expo, hosted by the Association for Diagnostics & Laboratory Medicine (formerly known as AACC), taking place at McCormick Place in Chicago, IL, USA from July 27 to 31.

Exhibition Details:

- ◆ **Event:** ADLM 2025 Clinical Lab Expo
- ◆ **Venue:** McCormick Place, Chicago, IL, USA
- ◆ **Conference Website:** <https://meeting.myadlm.org>
- ◆ **Exhibition Dates:** July 29 - 31
- ◆ **NOF Booth:** #3340

Highlighted Products:

1. BIOLIPIDURE® Series

MPC polymer-based additives suitable for various immunoassays such as lateral flow tests, latex agglutination test, ELISA, CLIA, etc. There will be an update on data related to SARS-CoV-2 antigen and antibody rapid tests.

- ◆ Features:
 - Reduced non-specific adsorption.
 - Antibody and enzyme stabilization
 - Enhanced sensitivity and accuracy
 - Consistent quality with little lot-to-lot variations and little biohazardous risks

2. Prototype of MPC Polymer

The prototype of MPC polymer, specifically developed for lateral flow tests, will be highlighted.

- ◆ Features:
 - Enhanced sensitivity and accuracy
 - Improved Signal-to-Noise (S/N) ratio

3. LIPIDURE® -GD Series

New additives specifically developed for PCR-based IVD.

- ◆ Features:
 - Increased sensitivity and detection efficiency
 - Enhanced stability of the master mix

4. EVERBRITE® Series

Activated PEG derivatives suitable for IVD formulation.

◆ Features:

- Mono-functional linear PEGs:
Suppression of non-specific adsorption on magnetic beads and microplates
Stabilization of enzymes
- Hetero-type activated PEGs:
Linker for immobilized antibody, enzyme-labeled antibody, and antigen
- Multi-arm PEGs:
Accumulation of secondary antibodies

For more information on our products, please visit our booth #3340 during the event, or contact our regional office.
