OCT 2016

## **NOF EXHIBITS AT MEDICA 2016 / COMPAMED2016 , Düsseldorf, Germany (NOVEMBER 14 – 17)**

We would like to inform you that NOF CORPORATION will exhibit at this year's COMPAMED and MEDICA at Exhibition Centre and Congress Center, Düsseldorf, Germany from NOVEMBER 14 to NOVEMBER 17 (<https://medica.messe-dus.co.jp/home/>)

### <Our Booth#>

COMPAMED : HALL8b / A13 (exhibit independently)

MEDICA : HALL16 / B49 (in the AMED\* Booth)

\* AMED : Japan Agency for Medical Research and Development

### < Biocompatible material for medical device >

Lipidure<sup>®</sup> series have following features as coating agent for medical devices.

- Lipidure<sup>®</sup>-CR2001 can bind with base materials chemically by photo irradiation and is useful for biocompatibility and lubricity
- Lipidure<sup>®</sup>-CM5206 can adhere to base materials physically and is useful for biocompatibility and lubricity  
(Lipidure<sup>®</sup>-CM5206 has been filed on FDA device master file)
- Lipidure<sup>®</sup>-NH01 which includes amine group can react to base materials having some functional group on the surface chemically and is useful for biocompatibility and lubricity

### <Additives for diagnostics>

Biolipidure<sup>®</sup> series (MPC polymer) have following features as diagnostic reagent.

- Enhancement of sensitivity and accuracy
- Suppression of non-specific adsorption
- Stabilization of antibody and enzymes
- NO lot-to-lot variations and NO biohazardous risk.

### <New Products >

- Lower molecular weight type of Biolipidure<sup>®</sup> which is similar to BSA (Bovine Serum Albumin) in terms of physical properties
- Specialized blocking reagent which has high durability against washing step

You are very welcome to visit our booth during the conference or contact our regional office below.
